Engine Stand Pro

Safe positioning of heavy engines

Mobile, electric engine and gearbox assembly stand with lifting and swivel axes

for ergonomic, safe and efficient working.

- Max. load capacity 400 kg
- Max. bending torque 2000 Nm
- 400 mm stroke
- Infinite rotation
- Battery operation

Item no: 6401-213

€11.995

Valid until 31 March 2027

CE-certified

Tested safety and tried-and-tested industrial components ensure maximum reliability – even in daily workshop use.

Long service life

Outstanding material and manufacturing quality, as well as maintenance-free technology, ensure long-term, reliable operation.

Sturdy

Thanks to its steel base frame, the stand remains stable when the castors are locked and is still easy to move when unlocked.

Self-locking in any position

Motors remain securely in the needed working position at all times – even without a power supply or under heavy loads.

Battery power

The powerful 24 V rechargeable battery enables numerous assembly cycles. The battery can be swapped in a matter of seconds.

Comprehensive & After-sales Service

Personal, reliable and professional – we continue to support you with first-class service even after your purchase.

Ergonomic working

Electric lifting and rotation reduce physical strain and enable comfortable working in any assembly position.

Speed

The backlash-free axes and the motor's stepless positioning save time, simplify assembly work and increase precision.
